LEAD FREE*

Series LFN55B-M1

Water Pressure Reducing Valves**

Sizes: ½" - 1"

Series LFN55B-M1 Water Pressure Reducing Valves are designed to reduce incoming water pressure to a sensible level to protect plumbing system components and reduce water consumption. The LFN55B features Lead Free* construction to comply with Lead Free* installation requirements. This series is suitable for water supply pressures up to 400psi (27.6 bar) and may be adjusted from 25 to 75psi (172 – 517 kPa). The standard setting is 50psi (345 kPa). All parts are quickly and easily serviceable without removing the valve from the line. The standard bypass feature permits the flow of water back through the valve into the main when pressures, due to thermal expansion on the outlet side of the valve, exceed the pressure in the main supply.

Features

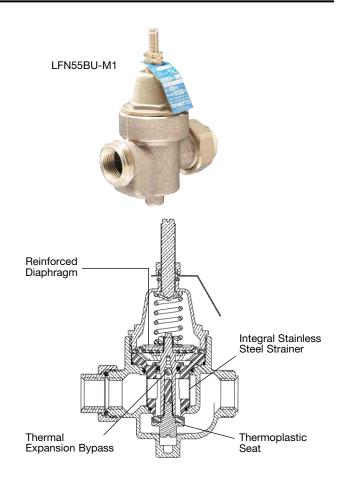

- Integral stainless steel strainer
- Thermoplastic seat
- Lead Free* brass body construction
- Serviceable in line
- Bypass feature controls thermal expansion pressure***
- Sealed spring cage on all models for accessible outdoor or pit installations

Specifications

Standard Specifications: A Water Pressure Reducing Valve with integral strainer shall be installed in the water service pipe near its entrance to the building where supply main pressure exceeds 60psi (413 kPa) to reduce it to 50psi (345 kPa) or lower. The water pressure reducing valve shall be constructed using Lead Free* materials. Lead Free* regulators shall comply with state codes and standards, where applicable, requiring reduced lead content. The valve shall feature a Lead Free* brass body suitable for water supply pressures up to 400psi (27.6 bar). Provision shall be made to permit the bypass flow of water back through the valve into the main when pressures, due to thermal expansion on the outlet side of the valve, exceed the pressure in the main supply. Water Pressure Reducing Valve with builtin bypass check valves will be acceptable. Approved valve shall be listed to ASSE 1003 and IAPMO and certified to CSA B356. Valve shall be a Watts Series LFN55B-M1.

NOTICE

The information contained herein is not intended to replace the full product installation and safety information available or the experience of a trained product installer. You are required to thoroughly read all installation instructions and product safety information before beginning the installation of this product.

Materials

Body: Lead Free* brass Seat: Thermoplastic

Cage: Bronze

Integral Strainer: Stainless steel
Diaphragm: Reinforced EPDM

Valve Disc: Elastomer

- * The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.
- ** A water saving test program concluded that reducing the supply pressure from 80-50psi (551-345 kPa) resulted in a water savings of 30%.
- *** The bypass feature will not prevent the pressure relief valve from opening on the hot water supply system with pressure above 150psi (10.3 bar).

Pressure — Temperature

Temperature Range: 33°F – 180°F (0.5°C – 82°C) Maximum Working Pressure: 400psi (27.6 bar)

Adjustable Reduced Pressure Range:

25 - 75psi (172 - 517 kPa)

Standard Reduced Pressure Setting: 50psi (345 kPa)

Standards

Meets requirements of ASSE Standard 1003; (ANSI A112.26.2) and CSA Standard B356. Certified by NSF to ANSI/NSF Standard 61-G. Listed by IAPMO.

Options

Add Suffix

" " NPT threaded female inlet x NPT female outlet
 U NPT threaded union inlet x NPT female outlet
 -U-S Solder union inlet x NPT female outlet
 -w/press**** Press inlet x press outlet (non union)

-DU Double Union - NPT threaded union female inlet

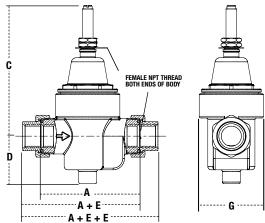

and outlet

-DU-S Double Union - Solder union inlet and outlet -DU-PEX Double Union - PEX union inlet and outlet -DU-CPVC Double Union - CPVC union inlet and outlet

-G Gauge tapping, 1/8" (3mm)

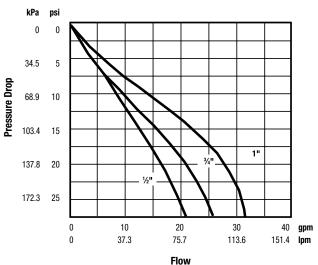

-LP Low pressure range 10-35psi (69 - 241 kPa)
 ****Viega ProPress® connections are optional factory installed fittings on each end of the approved/certified assembly.

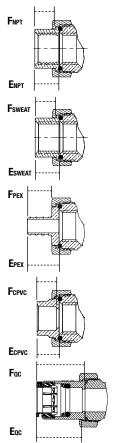

Dimensions - Weights

ABOVE VALVE SHOWN WITH SINGLE NPT UNION CONNECTION ON INLET VALVES MAY BE ORDERED WITH 0,1,0R 2 UNION CONNECTIONS USING ANY COMBINATION OF NPT, SOLDER, PEX OR CPVC CONNECTIONS REQUIRED
